Cover Pool Information

G1.1 General cover pool information

G2 **Outstanding CBs** 

G3 Legal ALM (balance principle) adherence

G4 Additional characteristics of ALM business model for issued CBs

M1/B1 Number of loans by property category M2/B2 Lending by property category, DKKbn

M3/B3 Lending, by loan size, DKKbn

M4a/B4a Lending, by-loan to-value (LTV), current property value, DKKbn M4b/B4b Lending, by-loan to-value (LTV), current property value, Per cent

M4c/B4c Lending, by-loan to-value (LTV), current property value, DKKbn ("Sidste krone") M4d/B4d Lending, by-loan to-value (LTV), current property value, Per cent ("Sidste krone")

THE PARTY OF THE P

M5/B5 Lending by region, DKKbn

M6/B6 Lending by Ioan type - IO Loans, DKKbn

M7/B7 Lending by loan type - Repayment Loans / Amortizing Loans, DKKbn

M8/B8 Lending by loan type - All loans, DKKbn

M9/B9 Lending by Seasoning, DKKbn (Seasoning defined by duration of customer relationship)

M10/B10 Lending by remaining maturity, DKKbn

M11/B11 90 day Non-performing loans by property type, as percentage of instalments payments, %

M11a/B11a 90 day Non-performing loans by property type, as percentage of lending, %

M11b/B11b 90 day Non-performing loans by property type, as percentage of lending, by continous LTV bracket, %

M12/B12 Realised losses (DKKm) M12a/B12a Realised losses (%)

**Key Concepts** 

**Key Concepts Explanation** X1 X2 **Key Concepts Explanation** ХЗ General explanation

This transparency template is compliant with the requirements in CRR 129(7) and is used with ECBC labelled covered bonds issues by the three issuer categories below.

# Mandatory tables

Please note that not all tables are applicable to each issuer type and that some information is optional. Information on applicability is given below and where relevant in connection with the tables in the template.

# Specialised mortgage banks

Tables A, Ğ1.1, G2-4, M1-M12, X1-3

Ship finance institutes

Tables A, G1.1, G2-4, S1-S13, X1-3

### Non-specialised bank CBs issuers

Tables G1.1 (except totall capital covarage), G2-4, B1-B1, X1-3

<u>Voluntary tables</u>
The issuer can insert voluntary tables that contain information in addition to what is contained in the Danish ECBC label tamplate. It shall be possible to distinquish mandatory an voluntory tables.

The voluntary tables must be named V1....Vn, where n is the number af voluntary tables. Voluntary tables must be maked with a colur different from the colour used forrthe mandatory talbles in the Danish ECBC label tamplate.

|---|--|--|
| Residential versus commercial mortgages   |  |  |
| Description of the difference made between residential/owner occupied and commercial properties   | The Danish FSA sets guidelines for the grouping of property in categories. Property type is determined by its primary use.   |  |
|   | Property which primary purpose is owner occupation is characterised as residential. Whereas properties primarily used for commercial purposes are classified as commercial (cf. below).  The Danish FSA sets guidelines for the grouping of property in categories. Examples |  |
| Describe when you classify a property as commercial?  | of application of which classifies property as commercial are:  Office   |  |
| E.g.: Private rental, Manufacturing and Manual Industries, Offices and Business, Agriculture.   | · Retail/snop  |  |
|   | Warehouse     Restaurants, inns etc.   |  |
|   | Hotels and resorts   |  |
|   | <ul> <li>Congress and conference centres.</li> </ul>   |  |
|   | Campsites.   |  |
|   | <ul> <li>Traffic terminals, service stations, fire stations, auction<br/>and export houses.</li> </ul>   |  |
|   | · Agriculture  |  |
|   | · Forestry   |  |
|   | Nurseries     Ships  |  |
|   |  |  |
| NPL (Non-performing loans)  |  |  |
|   | A loan is categorised as non-performing when a borrower neglects a payment failing to pay instalments and / or interests.  |  |
| Describe how you define NPLs  | The NPL rate is calculated at different time periods after the original payment date. Standard in Table A is 90 day arrear.  |  |
|   | Commercial bank CB issuers adhere to the Basel definition of NPL.  |  |
| Explain how you distinguish between performing and nonperforming loans in the cover pool?   | No distinction made. Asset substitution i not allowed for specialised mortgage banks   | •  |
|   | The Basel definition of NPL's is applied for commercial bank CB issuers Asset substitution i not allowed for specialised mortgage banks, hence NPLs are part   |  |
| Are NPLs parts of eligible assets in cover pool? Are NPL parts of non eligible assets in cover pool?  | ·  |  |
|   | For commercial bank CB issuers NPL's are eligible assets in the cover pool.  Asset substitution i not allowed for specialised mortgage banks, hence loans in foreclosure are part of the cover pool.   |  |
| Are loans in foreclosure procedure part of eligible assets in cover pool?   | For commercial bank CB issuers loans in foreclosure procedure are eligible assets in the cover pool.   |  |
| If NPL and/or loans in foreclosure procedure are part of the covered pool which provisions are made in respect of the value of these loans in the cover pool? | n The Danish FSA set rules for loss provisioning. In case of objective evidence of impairment provisioning for loss must be made.  |  |

| Loan-to-Value (LTV)  | Legal framework for valuation and LTV-calculation follow the rules of the Danish FSA - Bekendtgørelse nr. 687 af 20. juni 2007   |
| Describe the method on which your LTV calculation is based               | The publication contains two different ways to monitor LTV. One where loans are distributed continuously and one where they are distributed discretely. In both tables the fair value of the loans are distributed into predefined LTV bracket intervals. Table M4a/b4a and M4b/B4b displays the loans continuously. Table M4c/B4c and M4d/B4d displays the loans discretely.  The continuous table(M4a/b4a and M4b/B4b) distributes the loans from the start Itv of the loan to the marginal Itv. This means that, if the loan is first rank, it is distributed proportionaly by bracket size from 0 to the marginal Itv into the predefined brackets. If the loans has prior liens, it is distributed from the marginal Itv of the prior liens to the marginal Itv of the loan under consideration.  The discrete table (M4c/b4c and M4d/B4d) distributes the total fair value of each loan into a single Itv bracket, according to the marginal Itv of the loan under consideration. Average LTV is weighted by loan balance categorised by property type.  Example 1a below shows a case where the loan is first rank and distributed continuously. Example 1b shows the case where the loans has prior liens and distributed continuously. Example 2 below shows the discrete distribution of a loan. |
| Frequency of collateral valuation for the purpose of calculating the LTV | Example 1a  Explanation  Example of a proportionally distribution into LTV brackets for a loan with LTV of 75 pct and a loan size of 1 million and no prior liens. | Core tier 1 capital  | Equity capital and retained earnings.   |

| General explanation        | General practice in Danish market  | The issuer can elaborate on the applied balance priciple.         |
|----------------------------|--|---|
| Table G3                   |  | E.g. describe if stricter pratice is applied than required by law |
| General balance principle  | The general balance principle does not require a one-to-one balance between the loan and the bonds issued. This gives the credit institution a wider scope for taking liquidity risk than the more strict specific balance principle.  |   |
| Specific balance principle | The specific balance principle ensures a one-to-one balance between loans and bonds issued, and is used for the issuance of SDRO, SDO and RO bonds.  The specific balance principle de facto implies full cash flow pass through from borrowers to investors. Under this principle daily loan origination is continuously tapped into the market, and the individual borrower loan rate is determined directly by the bond sales price for the corresponding financing amount of bonds. All borrower payments of interest and principal match the interest and principal payments to investors exactly (borrower payments fall due one day prior to the payment sto investors). Redemptions take place by borrowers' buy back of the financing bond in the market at market price, or (for callable bonds) by calling the bond at par. In the latter case the borrower prepayment match the bond draw down.  Market risks are thus eliminated under this issuance model (i.e. interest rate risk, prepayment risks, liquidity risks and funding risks). Further, asset substitution is not possible under this issuance model. |   |

| General explanation  | General practice in Danish market   |
|--|---|
| Table G4   | General practice in Danish market   |
| One-to-one balance between terms of granted loans and bonds issued, i.e. daily tap issuance? | Mortgage banks issue and sell bonds to investors, who then fund the loans. During the loan terms, borrowers make principal and interest payments to mortgage banks which transfer the amounts to investors. Mortgage banks charge a margin from the borrower to cover daily operating costs, potential losses, and to make a profit. The margin is a percentage of the outstanding debt which the borrower pays throughout the loan term. The margin rate corresponds to the interest margin of a bank but is generally lower. The issuance is made on a daily basis. |
| Pass-through cash flow from borrowers to investors?  | Yes, the mortgage bank is an intermediary between persons requiring loans for the purchase of real properties and investors funding the loans by purchasing bonds.  |
| Asset substitution in cover pool allowed?  | No, (due to Danish legislation) asset substitution is not allowed/possible.   |
