The issuer believes that, at the time of its issuance and based on transparency data made publicly available by the issuer, these covered bonds would satisfy the eligibility criteria for Article 129(7) of the Capital Requirements Regulation (EU) 648/2012. It should be noted, however, that whether or not exposures in the form of covered bonds are eligible to preferential treatment under Regulation (EU) 648/2012 is ultimately a matter to be determined by a relevant investor institution and its relevant supervisory authority and the issuer does not accept any responsibility in this regard.

# C. Harmonised Transparency Template - Glossary

HTT 2020

The definitions below reflect the national specificities

| Field Number       | 1. Glossary - Standard Harmonised Items  | [Insert Definition Below]   |
|--------------------|--|---|
| HG.1.1<br>HG.1.2   | OC Calculation: Actual   | Total value of cover pool subtracted nominal value of covered bonds   |
| HG.1.2<br>HG.1.3   | OC Calculation: Legal minimum<br>OC Calculation: Committed   | Minimum legal required OC of RWA<br>ND2   |
|                    |  | Index Loans:<br>These are loans where instalments and outstanding debt are adjusted with the development of an index which typically reflects trends in consumer prices. The loan type was<br>introduced in Denmark in 1982. All Danish index loans have index semi-annual payment dates (January 1st and July 1st). Index loans are offered as cash loans. The maturity<br>depends on the loan type. Especially the maturity for subsidized housing depends on the size of the future inflation rate.  |
|                    |  | Fixed-rate loans:<br>The long-term – typically 30-year – fixed-rate, callable loan is considered the most traditional mortgage loan. With this loan, the borrower knows in advance the fixed<br>repayments throughout the term of the loan. The long-term fixed-rate mortgage loan has a prepayment option which may be exercised in two ways, i.e. the borrowers may<br>prepay their outstanding debt at a price of 100 (par) or the borrowers may purchase the underlying bonds in the financial markets and deliver them to the mortgage bank. This<br>loan type is also offered with interest-only periods.   |
|                    | Interest Rate Types  | Adjustable Rate Mortgages:<br>Adjustable-rate mortgages (ARMs) were introduced in 1996 and the main advantage of ARMs is that interest rates are generally lower than those of fixed-rate loans when<br>raised. The interest rate is generally reset at a frequency of 1, 3, 5 or 10 years and the underlying bonds are replaced by new bonds. The yield of the new bonds determines the<br>loan rate for the period until the next interest rate reset. The lower initial loan rate should therefore be weighed against the risk that it will increase during the loan term. An<br>ARM may be prepaid at a price of 100 in connection with each interest rate reset. Alternatively, the borrower may prepay the loan by purchasing the bonds on market terms –<br>as with all mortgage loans. This loan type is also offered with interest-only periods. |
|                    |  | Money market based loans:<br>The loan rate changes at generally three or six months. In addition, this loan type differs from ARMs as this interest rate depends on a reference rate, ie an interest rate<br>determined in another market. The reference rate of DKK-denominated loans is CIBOR (Copenhagen Interbank Offered Rate) or CITA (Copenhagen Interbank Tomorrow/Next<br>Average ), an interest rate which is quoted daily by NASDAQ. This loan type is also offered with interest-only periods.  |
|                    |  | Non Capped floaters:<br>These are loans where the rate changes at generally three or six months. The reference rate of DKK-denominated loans is CIBOR (Copenhagen Interbank Offered Rate) or CITA<br>(Copenhagen Interbank Tomorrow/Next Average ), an interest rate which is quoted daily by OMX NASDAQ<br>Capped floaters: It is possible to get a loan with a floating interest rate which cannot exceed a certain level (cap). In this way, the borrower hedges against major interest rate<br>increases. If a loan has a cap of 6%, then the interest rate can never be higher than 6%. The loan rate will track Cibor (or Euribor / Cita), as long as it does not exceed 6%. A<br>floating-rate loan may be prepaid in two ways: either at an agreed price – typically 100 or 105 – or the borrower may buy the underlying bonds at market price.   |
| HG.1.4             |  | Other:<br>Any other loan types, which not comply with the above mentioned.  |
|                    | Residual Life Buckets of Cover assets [i.e. how is the contractual and/or expected residual life defined? What   | Only contratual maturity is relevant and reported. Early repayments happens at borrowes discretion is among other thing depending on  |
| HG.1.5             | assumptions eg, in terms of prepayments? etc.]   | interest rate developments and cannot be anticipated by issuer.   |
|                    | Maturity Buckets of Covered Bonds [i.e. how is the contractual and/or expected maturity defined? What maturity structure (hard bullet, soft bullet, conditional pass through)? Under what conditions/circumstances?<br>Etc.] | Only contratual maturity is relevant and reported. Early repayments happens at borrowes discretion is among other thing depending on interest rate developments and cannot be anticipated by issuer.  |
| HG.1.6             | LTVs: Definition   | LTV is reportet continuously. The loans are distributed from the start Itv of the loan to the marginal Itv. This means that, if the loan is first rank,<br>it is distributed proportionaly by bracket size from 0 to the marginal   |
| HG.1.7             | ITVs: Calculation of property/shipping value   |   |
| HG.1.8             | LTVs: Calculation of property/shipping value   |   |
| HG.1.9             | LTVs: Applied property/shipping valuation techniques, including whether use of index, Automated Valuation<br>Model (AVM) or on-site audits   |   |
| HG.1.10            | LTVs: Frequency and time of last valuation   | Minimum once pr. year for commercial properties. Minimum once every third year for owner occupied.  |
| HG.1.11            | Explain how mortgage types are defined whether for residential housing, multi-family housing, commercial real estate, etc. Same for shipping where relecvant   | The Danish FSA sets guidelines for the grouping of property in categories. Property type is determined by its primary use.  |
| HG.1.11            | Hedging Strategy (please explain how you address interest rate and currency risk)  |   |
|                    | Non-performing loans   | A loan is categorised as non-performing when a borrower neglects a payment failing to pay instalments and / or interests.   |

V1

**Regulatory requirement** 

This transparency template is compliant with the requirements in CRR 129(7) and is used with ECBC labelled covered bonds issues by the three issuer categories below.

#### Mandatory tables

Please note that not all tables are applicable to each issuer type and that some information is optional. Information on applicability is given below and where relevant in connection with the tables in the template.

#### Specialised mortgage banks

Tables A, G1.1, G2-4, M1-M12, X1-3 **Ship finance institutes** Tables A, G1.1, G2-4, S1-S13, X1-3 **Non-specialised bank CBs issuers** Tables G1.1 (except totall capital covarage), G2-4, B1-B1, X1-3

#### **Voluntary tables**

The issuer can insert voluntary tables that contain information in addition to what is contained in the Danish ECBC label tamplate. It shall be possible to distinguish mandatory an voluntory tables.

The voluntary tables must be named V1....Vn, where n is the number af voluntary tables.

Voluntary tables must be maked with a colur different from the colour used for the mandatory tables in the Danish ECBC label tamplate.

|  | and export houses.  |  |
|  | Agriculture   |  |
|  | · Forestry  |  |
|  | · Nurseries   |  |
|  | · Ships   |  |
| IPL (Non-performing loans)   |   |  |
|  | A loan is categorised as non-performing when a borrower neglects a payment  |  |
|  | failing to pay instalments and / or interests.  |  |
| escribe how you define NPLs  | The NPL rate is calculated at different time periods after the original payment date.                                   |  |
|  | Standard in Table A is 90 day arrear.   |  |
|  | Commercial bank CB issuers adhere to the Basel definition of NPL.   |  |
|  | No distinction made. Asset substitution i not allowed for specialised mortgage  |  |
| xplain how you distinguish between performing and nonperforming loans in                           |   |  |
| ne cover pool?   | The Basel definition of NPL's is applied for commercial bank CB issuers   |  |
|  | Asset substitution i not allowed for specialised mortgage banks, hence NPLs are   |  |
| re NPLs parts of eligible assets in cover pool? Are NPL parts of non eligible ssets in cover pool? |   |  |
|  | For commercial bank CB issuers NPL's are eligible assets in the cover pool.   |  |
|  |   |  |
|  | Asset substitution i not allowed for specialised mortgage banks, hence loans in   |  |
|  | Asset substitution i not allowed for specialised mortgage banks, hence loans in foreclosure are part of the cover pool. |  |
| re loans in foreclosure procedure part of eligible assets in cover pool?                           |   |  |
| re loans in foreclosure procedure part of eligible assets in cover pool?                           |   |  |

If NPL and/or loans in foreclosure procedure are part of the covered pool which The Danish FSA set rules for loss provisioning. In case of objective evidence of provisions are made in respect of the value of these loans in the cover pool? impairment provisioning for loss must be made.

|--|---|
| General explanation  | Conoral practice in Danich market   |
| Table A  | General practice in Danish market   |
| Total Balance Sheet Assets   | Total balance sheet assets as reported in the interim or annual reports of the issuer, fair value   |
| Total Customer Loans(fair value)   | All mortgage credit loans funded by the issue of covered mortgage bonds or mortgage bonds measured at fair value  |
| Tier 1 Ratio (%)   | The tier 1 capital ratio as stipulated in DFSA regulations  |
| Solvency Ratio (%)   | The solvency ratio as stipulated in DFSA regulations  |
| Outstanding Covered Bonds (fair value)   | The circulating amount of covered bonds (including covered mortgage bonds and mortgage bonds)   |
| Outstanding Senior Unsecured Liabilities   | All outstanding senior unsecured liabilities including any intra-group senior unsecured liabilities to finance OC- and LTV-ratio requirements                                     |
| Senior Secured Bonds   | Senior secured bonds - formerly known as JCB (§ 15)   |
| Guarantees (e.g. provided by states, municipals, banks)                                    | All guarantees backing the granted loans provided by e.g. states, municipalities or banks   |
| Net loan losses (Net loan losses and net loan loss provisions)                             | The item taken from the issuer's profit & loss account  |
| Value of acquired properties / ships (temporary possessions, end quarter)                  | Value as entered in interim and annual reports and as reported to the DFSA; The lower of the carrying amount at the time of classification and the fair value less selling costs. |
| Total customer loans (market value)  | All mortgage credit loans funded by the issue of covered mortgage bonds or mortgage bonds measured at market value  |
| Maturity   | Maturity distribution of all mortgage credit loans  |
| Non-performing loans (See definition in table X1)  | Please see definition of Non-performing loans in table X1   |
| Loan loss provisions (sum of total individual and group wise loss provisions, end quarter) | of All individual and group wise læoan loss provisions as stated in the issuer's interim and annual accounts  |

| General explanation   | General practice in Danish market   |
|---|---|
| Table G1.1  |   |
| Nominal cover pool (total value)  | Sum of nominal value of covered bonds + Senior secured debt + capital. Capital is: Additional tier 1 capital (e.g. hybrid core capital) and Core tier 1 capital |
| Transmission or liquidation proceeds to CB holders (for redemption of CBs | Liquidity due to be paid out next day in connection with refinancing  |
| maturing 0-1 day)   |   |
| Overcollateralisation   | Total value of cover pool - nominal value of covered bonds  |
| Senior secured debt   | Total nominal value of senior secured debt  |
| Senior unsecured debt   | Issuers senior unsecured liabilities targeted to finance OC- and LTV-ratio requirements in cover pool   |
| Tier 2 capital  | Subordinated debt   |
| Additional tier 1 capital (e.g. hybrid core capital)                      | Hybrid Tier 1 capital (perpetual debt instruments).   |
| Core tier 1 capital   | Equity capital and retained earnings.   |

|                            | General practice in Danish market  | The issuer can elaborate on the applied balance priciple.         |
|----------------------------|--|---|
| Table G3                   |  | E.g. describe if stricter pratice is applied than required by law |
| General balance principle  | The general balance principle does not require a one-to-one balance between the loan and the bonds issued. This gives the credit institution a wider scope for taking liquidity risk than the more strict specific balance principle.  |   |
|                            | The specific balance principle ensures a one-to-one balance between loans and<br>bonds issued, and is used for the issuance of SDRO, SDO and RO bonds.<br>The specific balance principle de facto implies full cash flow pass through from   |   |
|                            | borrowers to investors. Under this principle daily loan origination is continuously<br>tapped into the market, and the individual borrower loan rate is determined<br>directly by the bond sales price for the corresponding financing amount of bonds.<br>All borrower payments of interest and principal match the interest and principal    |   |
| Specific balance principle | payments to investors exactly (borrower payments fall due one day prior to the<br>payments to investors). Redemptions take place by borrowers' buy back of the<br>financing bond in the market at market price, or (for callable bonds) by calling the<br>bond at par. In the latter case the borrower prepayment match the bond draw<br>down. |   |
|                            | Market risks are thus eliminated under this issuance model (i.e. interest rate risk, prepayment risks, liquidity risks and funding risks). Further, asset substitution is not possible under this issuance model.  |   |

| General explanation<br>Table G4  | General practice in Danish market   |
|--|---|
| One-to-one balance between terms of granted loans and bonds issued, i.e. daily tap issuance? | Mortgage banks issue and sell bonds to investors, who then fund the loans. During the loan terms, borrowers make principal and interest payments to mortgage banks which transfer the amounts to investors. Mortgage banks charge a margin from the borrower to cover daily operating costs, potential losses, and to make a profit. The margin is a percentage of the outstanding debt which the borrower pays throughout the loan term. The margin rate corresponds to the interest margin of a bank but is generally lower. The issuance is made on a daily basis. |
| Pass-through cash flow from borrowers to investors?  | Yes, the mortgage bank is an intermediary between persons requiring loans for the purchase of real properties and investors funding the loans by purchasing bonds.  |
| Asset substitution in cover pool allowed?  | No, (due to Danish legislation) asset substitution is not allowed/possible.   |

| Agriculture                         | Property and land for agricultural use. Max LTV 70 % (legislation).  |
| Social and cultural purposes        | Property used for education, kindergardens, museum and other buildings for public use. Max LTV are 70 % (legislation).                   |
| Other                               | Property, that can not be placed in the categories above. Max LTV are 70 %(legislation).   |

| General explanation       | General practice in Danish market   |
|---------------------------|---|
| Table M6-M8               |   |
| Index Loans               | These are loans where instalments and outstanding debt are adjusted with the development of an index which typically reflects trends in consumer prices. The loan ype was               |
| Fixed-rate loans          | The long-term – typically 30-year – fixed-rate, callable loan is considered the most traditional mortgage loan. With this loan, the borrower knows in advance the fixed repayments      |
| Adjustable Rate Mortgages | Adjustable-rate mortgages (ARMs) were introduced in 1996 and the main advantage of ARMs is that interest rates are generally lower than those of fixed-rate loans when raised.          |
| Money market based loans  | The loan rate changes at generally three or six months. In addition, this loan type differs from ARMs as this interest rate depends on a reference rate, ie an interest rate            |
| Non Capped floaters       | These are loans where the rate changes at generally three or six months. The reference rate of DKK-denominated loans is CIBOR (Copenhagen Interbank Offered Rate) or CITA               |
| Capped floaters           | It is possible to get a loan with a floating interest rate which cannot exceed a certain level (cap). In this way, the borrower hedges against major interest rate increases. If a loan |
| Other                     | Any other loan types, which not comply with the above mentioned.  |
