| | Fitch | - | - | - | - |

Table G3 – Legal ALM (balance principle) adherence¹

| | Issue adherence |
|----------------------------|------------------------|
| General balance principle | x |
| Specific balance principle | |

1) Cf. the Danish Executive Order on bond issuance, balance principle and risk management

Table G4 – Additional characteristics of ALM business model for issued CBs

| | Issue adherence | |
|--|------------------------|-----------|
| | Yes | No |
| One-to-one balance between terms of granted loans and bonds issued, i.e. daily tap issuance? | x | |
| Pass-through cash flow from borrowers to investors? | x | |
| Asset substitution in cover pool allowed? | | x |

Note: * A few older traditional danish mortgage bonds are not CRD compliant

Property categories are defined according to Danish FSA's AS-reporting form

Table M1/B1

Number of loans by property category

| | Owner-occupied homes | Holiday houses | Subsidised Housing | Cooperative Housing | Private rental | Manufacturing and Manual Industries | Office and Business | Agriculture | Social and cultural purposes | Other | Total |
|-------|----------------------|----------------|--------------------|---------------------|----------------|-------------------------------------|---------------------|-------------|------------------------------|-------|---------------|

Table X1
Key Concepts Explanation **General practice in Danish market**
If issuers Key Concepts Explanation differs from general practice: State and explain in this column.

| Residential versus commercial mortgages | |
|---|---|
| Description of the difference made between residential/owner occupied and commercial properties | The Danish FSA sets guidelines for the grouping of property in categories. Property type is determined by its primary use. |
| Describe when you classify a property as commercial? | Property which primary purpose is owner occupation is characterised as residential. Whereas properties primarily used for commercial purposes are classified as commercial (cf. below). The Danish FSA sets guidelines for the grouping of property in categories. Examples of application of which classifies property as commercial are: <ul style="list-style-type: none"> - Office - Retail/shop - Warehouse - Restaurants, inns etc. - Hotels and resorts - Congress and conference centres. - Campsites. - Traffic terminals, service stations, fire stations, auction and export houses. - Agriculture - Forestry - Nurseries - Ships |
| E.g.: Private rental, Manufacturing and Manual Industries, Offices and Business, Agriculture. | |
| NPL (Non-performing loans) | |
| Describe how you define NPLs | A loan is categorised as non-performing when a borrower neglects a payment failing to pay instalments and / or interests. The NPL rate is calculated at different time periods after the original payment date. Standard in Table A is 90 day arrear. Commercial bank CB issuers adhere to the Basel definition of NPL. |
| Explain how you distinguish between performing and nonperforming loans in the cover pool? | No distinction made. Asset substitution i not allowed for specialised mortgage banks. The Basel definition of NPL's is applied for commercial bank CB issuers Asset substitution i not allowed for specialised mortgage banks, hence NPLs are part of the cover pool. |
| Are NPLs parts of eligible assets in cover pool? Are NPL parts of non eligible assets in cover pool? | For commercial bank CB issuers NPL's are eligible assets in the cover pool. Asset substitution i not allowed for specialised mortgage banks, hence loans in foreclosure are part of the cover pool. |
| Are loans in foreclosure procedure part of eligible assets in cover pool? | For commercial bank CB issuers loans in foreclosure procedure are eligible assets in the cover pool. |
| If NPL and/or loans in foreclosure procedure are part of the covered pool which provisions are made in respect of the value of these loans in the cover pool? | The Danish FSA set rules for loss provisioning. In case of objective evidence of impairment provisioning for loss must be made. |

Table X2
Key Concepts Explanation **Issuer specific**
(N/A for some issuers)

| Guaranteed loans (if part of the cover pool) | |
|--|---|
| How are the loans guaranteed? Please provide details of guarantors | |
| Loan-to-Value (LTV) | |
| Describe the method on which your LTV calculation is based | Legal framework for valuation and LTV-calculation follow the rules of the Danish FSA - Bekendtgørelse nr. 687 af 20. juni 2007. LTV is calculated on each property on a loan-by-loan basis, and takes into account prior-ranking loans at fair values relative to the estimated property value based on the most recent valuation or market value. Fair value of the loan distributed are shown utilising LTV bracket intervals. The intervals become smaller as the percentage approaches par. This publication distributes the loan continuously from the lower LTV bracket to the upper brackets relative to fair value of the collateral. For loans where a part of the loan is covered by a guarantee from public authorities (non-profit housing) the guaranteed part is placed in the lower LTV bracket. |
| Frequency of collateral valuation for the purpose of calculating the LTV | <u>Example on continuously distribution into LTV brackets for a loan with fair value of 75 per cent.</u> This example loan will be distributed with 20 per cent of the value into the lower three brackets; 10 per cent in the fourth bracket and the remaining 5 per cent of the value in the last bracket. |

| Loan-to-value (distributed continuously) | | | | | | | | | | |
|--|---------|---------|---------|---------|---------|---------|---------|--------|------|---|
| 0-19.9 | 20-39.9 | 40-59.9 | 60-69.9 | 70-79.9 | 80-84.9 | 85-89.9 | 90-94.9 | 95-100 | >100 | |
| 20 | 20 | 20 | 10 | 5 | 0 | 0 | 0 | 0 | 0 | 0 |

Table X3

| General explanation | General practice in Danish market |
|---|---|
| Table A | |
| Total Balance Sheet Assets | Total balance sheet assets as reported in the interim or annual reports of the issuer, fair value |
| Total Customer Loans(fair value) | All mortgage credit loans funded by the issue of covered mortgage bonds or mortgage bonds measured at fair value |
| Tier 1 Ratio (%) | The tier 1 capital ratio as stipulated in DFSA regulations |
| Solvency Ratio (%) | The solvency ratio as stipulated in DFSA regulations |
| Outstanding Covered Bonds (fair value) | The circulating amount of covered bonds (including covered mortgage bonds and mortgage bonds) |
| Outstanding Senior Unsecured Liabilities | All outstanding senior unsecured liabilities including any intra-group senior unsecured liabilities to finance OC- and LTV-ratio requirements |
| Senior Secured Bonds | Senior secured bonds - formerly known as JCB (§ 15) |
| Guarantees (e.g. provided by states, municipalities, banks) | All guarantees backing the granted loans provided by e.g. states, municipalities or banks |
| Net loan losses (Net loan losses and net loan loss provisions) | The item taken from the issuer's profit & loss account |
| Value of acquired properties / ships (temporary possessions, end quarter) | Value as entered in interim and annual reports and as reported to the DFSA; The lower of the carrying amount at the time of classification and the fair value less selling costs. |
| Total customer loans (market value) | All mortgage credit loans funded by the issue of covered mortgage bonds or mortgage bonds measured at market value |
| Maturity | Maturity distribution of all mortgage credit loans |
| Non-performing loans (See definition in table X1) | Please see definition of Non-performing loans in table X1 |
| Loan loss provisions (sum of total individual and group wise loss provisions, end of quarter) | All individual and group wise loan loss provisions as stated in the issuer's interim and annual accounts |

| General explanation | General practice in Danish market |
|---|---|
| Table G1.1 | |
| Nominal cover pool (total value) | Sum of nominal value of covered bonds + Senior secured debt + capital. Capital is: Additional tier 1 capital (e.g. hybrid core capital) and Core tier 1 capital |
| Transmission or liquidation proceeds to CB holders (for redemption of CBs maturing 0-1 day) | Liquidity due to be paid out next day in connection with refinancing |
| Overcollateralisation | Total value of cover pool - nominal value of covered bonds |
| Senior secured debt | Total nominal value of senior secured debt |
| Senior unsecured debt | Issuers senior unsecured liabilities targeted to finance OC- and LTV-ratio requirements in cover pool |
| Tier 2 capital | Subordinated debt |
| Additional tier 1 capital (e.g. hybrid core capital) | Hybrid Tier 1 capital (perpetual debt instruments). |
| Core tier 1 capital | Equity capital and retained earnings. |

| General explanation | General practice in Danish market |
|----------------------------|---|
| Table G3 | |
| General balance principle | The general balance principle does not require a one-to-one balance between the loan and the bonds issued. This gives the credit institution a wider scope for taking liquidity risk than the more strict specific balance principle. |
| Specific balance principle | <p>The specific balance principle ensures a one-to-one balance between loans and bonds issued, and is used for the issuance of SDRO, SDO and RO bonds.</p> <p>The specific balance principle de facto implies full cash flow pass through from borrowers to investors. Under this principle daily loan origination is continuously tapped into the market, and the individual borrower loan rate is determined directly by the bond sales price for the corresponding financing amount of bonds. All borrower payments of interest and principal match the interest and principal payments to investors exactly (borrower payments fall due one day prior to the payments to investors). Redemptions take place by borrowers' buy back of the financing bond in the market at market price, or (for callable bonds) by calling the bond at par. In the latter case the borrower prepayment match the bond draw down.</p> <p>Market risks are thus eliminated under this issuance model (i.e. interest rate risk, prepayment risks, liquidity risks and funding risks). Further, asset substitution is not possible under this issuance model.</p> |

| General explanation | General practice in Danish market |
|--|---|
| Table G4 | |
| One-to-one balance between terms of granted loans and bonds issued, i.e. daily tap issuance? | Mortgage banks issue and sell bonds to investors, who then fund the loans. During the loan terms, borrowers make principal and interest payments to mortgage banks which transfer the amounts to investors. Mortgage banks charge a margin from the borrower to cover daily operating costs, potential losses, and to make a profit. The margin is a percentage of the outstanding debt which the borrower pays throughout the loan term. The margin rate corresponds to the interest margin of a bank but is generally lower. The issuance is made on a daily basis. |
| Pass-through cash flow from borrowers to investors? | Yes, the mortgage bank is an intermediary between persons requiring loans for the purchase of real properties and investors funding the loans by purchasing bonds. |
| Asset substitution in cover pool allowed? | No, (due to Danish legislation) asset substitution is not allowed/possible. |

| General explanation | General practice in Danish market |
|-------------------------------------|--|
| Table M1-M5 | |
| Owner-occupied homes | Private owned residentials used by the owner. Max LTV are 80 % (legislation). |
| Holiday houses | Holiday houses for owners own use or for renting. Max LTV are 60 % (legislation). |
| Subsidised Housing | Residential renting subsidised by the government. Max LTV 80 %. LTVs above 80 % can be granted against full governmental guarantee. |
| Cooperative Housing | Residential property owned and administered by the cooperative and used by the members of the cooperative. Max LTV 80 % (legislation). |
| Private rental | Residential property rented out to private tenants. Max LTV 80 % (legislation). |
| Manufacturing and Manual Industries | Industrial and manufacture buildings and warehouse for own use or for rent. Max LTV are 60 % (legislation). |
| Office and Business | Office property and retail buildings for own use or for rent. Max LTV are 60 % (legislation). |
| Agriculture | Property and land for agricultural use. Max LTV 70 % (legislation). |
| Social and cultural purposes | Property used for education, kindergardens, museum and other buildings for public use. Max LTV are 70 % (legislation). |
| Other | Property, that can not be placed in the categories above. Max LTV are 70 % (legislation). |

| General explanation | General practice in Danish market |
|---------------------------|---|
| Table M6-M8 | |
| Index Loans | These are loans where instalments and outstanding debt are adjusted with the development of an index which typically reflects trends in consumer prices. The loan type was |
| Fixed-rate loans | The long-term – typically 30-year – fixed-rate, callable loan is considered the most traditional mortgage loan. With this loan, the borrower knows in advance the fixed repayments |
| Adjustable Rate Mortgages | Adjustable-rate mortgages (ARMs) were introduced in 1996 and the main advantage of ARMs is that interest rates are generally lower than those of fixed-rate loans when raised. The |
| Money market based loans | The loan rate changes at generally three or six months. In addition, this loan type differs from ARMs as this interest rate depends on a reference rate, ie an interest rate determined in |
| Non Capped floaters | These are loans where the rate changes at generally three or six months. The reference rate of DKK-denominated loans is CIBOR (Copenhagen Interbank Offered Rate) or CITA |
| Capped floaters | It is possible to get a loan with a floating interest rate which cannot exceed a certain level (cap). In this way, the borrower hedges against major interest rate increases. If a loan has a |
| Other | Any other loan types, which not comply with the above mentioned. |
