C. Harmonised Transparency Template - Glossary

OHG.3.3 OHG.3.4 OHG.3.5

The definitions below reflect the national specificities 1. Glossary - Standard Harmonised Items [Insert Definition Below] **Field Number** HG 1 1 OC Calculation: Actual Total value of cover pool subtracted nominal value of covered bonds OC Calculation: Legal minimum HG.1.2 Minimum legal required OC of RWA HG.1.3 OC Calculation: Committed ND2 These are loans where instalments and outstanding debt are adjusted with the development of an index which typically reflects trends in consumer prices. The loan type was introduced in Denmark in 1982. All Danish index loans have index semi-annual payment dates (January 1st and July 1st). Index loans are offered as cash loans. The maturity depends on the loan type. Especially the maturity for subsidized housing depends on the size of the future inflation rate. The long-term – typically 30-year – fixed-rate, callable loan is considered the most traditional mortgage loan. With this loan, the borrower knows in advance the fixed repayments throughout the term of the loan. The long-term fixed-rate mortgage loan has a prepayment option which may be exercised in two ways, i.e. the borrowers may prepay their outstanding debt at a price of 100 (par) or the borrowers may purchase the underlying bonds in the financial markets and deliver them to the mortgage bank. This loan type is also offered with interest-only periods. Adjustable Rate Mortgages Adjustable-rate mortgages (ARMs) were introduced in 1996 and the main advantage of ARMs is that interest rates are generally lower than those of fixed-rate loans when raised. The interest rate is generally reset at a frequency of 1, 3, 5 or 10 years and the underlying bonds are replaced by new bonds. The yield of the new bonds determines the loan rate for the period until the next interest rate reset. The lower initial loan rate should therefore be weighed against the risk that it will increase during the loan term An ARM may be prepaid at a price of 100 in connection with each interest rate reset. Alternatively, the borrower may prepay the loan by purchasing the bonds on market terms – as with all mortgage loans. This loan type is also offered with interest-only periods. Interest Rate Types The loan rate changes at generally three or six months. In addition, this loan type differs from ARMs as this interest rate depends on a reference rate, ie an interest rate ted Ioans is CIBOR (Copenhagen Interbank Offered Rate) or CITA (Copenhagen Interbank Tomorrow/Next Average), an interest rate which is quoted daily by NASDAQ. This loan type is also offered with interest-only periods. Non Capped floaters: These are loans where the rate changes at generally three or six months. The reference rate of DKK-denominated loans is CIBOR (Copenhagen Interbank Offered Rate) or CITA (Copenhagen Interbank Tomorrow/Next Average), an interest rate which is quoted daily by OMX NASDAQ

Capped floaters: It is possible to get a loan with a floating interest rate which cannot exceed a certain level (cap). In this way, the borrower hedges against major interest rate increases. If a loan has a cap of 6%, then the interest rate can never be higher than 6%. The loan rate will track Cibor (or Euribor / Cita), as long as it does not exceed 6%. A floating-rate loan may be prepaid in two ways: either at an agreed price – typically 100 or 105 – or the borrower may buy the underlying bonds at market price. Any other loan types, which not comply with the above mentioned. HG.1.4 Residual Life Buckets of Cover assets [i.e. how is the contractual and/or expected residual life Only contratual maturity is relevant and reported. Early repayments happens at borrowes discretion is among other thing depending on defined? What assumptions eg, in terms of prepayments? etc.] interest rate developments and cannot be anticipated by issuer. HG.1.5 Maturity Buckets of Covered Bonds [i.e. how is the contractual and/or expected maturity Only contratual maturity is relevant and reported. Early repayments happens at borrowes discretion is among other thing depending on defined? What maturity structure (hard bullet, soft bullet, conditional pass through)? Under interest rate developments and cannot be anticipated by issuer. what conditions/circumstances? Etc.1 HG 1 6 LTV is reportet continuously. The loans are distributed from the start lty of the loan to the marginal lty. This means that, if the loan is first LTVs: Definition rank, it is distributed proportionaly by bracket size from 0 to the marginal HG.1.7 LTVs: Calculation of property/shipping value HG.1.8 LTVs: Applied property/shipping valuation techniques, including whether use of index. Automated Valuation Model (AVM) or on-site audits LTVs: Frequency and time of last valuation Minimum once pr. year for commercial properties. Minimum once every third year for owner occupied. HG.1.10 Explain how mortgage types are defined whether for residential housing, multi-family housing, The Danish FSA sets guidelines for the grouping of property in categories. Property type is determined by its primary use. commercial real estate, etc. Same for shipping where relecvant HG 1 11 Hedging Strategy (please explain how you address interest rate and currency risk) HG 1 12 Non-performing loans A loan is categorised as non-performing when a borrower neglects a payment failing to pay instalments and / or interests. HG.1.13 OHG.1.1 NPV assumptions (when stated) ND1 OHG.1.2 OHG.1.3 OHG.1.4 OHG.1.5 2. Reason for No Data HG.2.1 Not applicable for the jurisdiction ND1 HG 2 2 Not relevant for the issuer and/or CB programme at the present time ND2 HG.2.3 Not available at the present time ND3 HG.2.1 OHG.2.1 OHG.2.2 OHG.2.3 ary - Extra national and/or Issuer Items HG.3.1 Other definitions deemed relevant [For completion] OHG.3.1 OHG.3.2

Volentary tables

V1 Regulatory requirement

This transparency template is compliant with the requirements in CRR 129(7) and is used with ECBC labelled covered bonds issues by the three issuer categories below.

Mandatory tables

Please note that not all tables are applicable to each issuer type and that some information is optional. Information on applicability is given below and where relevant in connection with the tables in the template.

Specialised mortgage banks

Tables A, G1.1, G2-4, M1-M12, X1-3

Ship finance institutes

Tables A, G1.1, G2-4, S1-S13, X1-3

Non-specialised bank CBs issuers

Tables G1.1 (except totall capital covarage), G2-4, B1-B1, X1-3

Voluntary tables

The issuer can insert voluntary tables that contain information in addition to what is contained in the Danish ECBC label tamplate. It shall be possible to distinguish mandatory an voluntory tables.

The voluntary tables must be named V1....Vn, where n is the number af voluntary tables.

Voluntary tables must be maked with a colur different from the colour used forrthe mandatory tables in the Danish ECBC label tamplate.

Table X1		
Key Concepts Explanation	General practice in Danish market	If issuers Key Concepts Explanation differs from general practice: State and explain in this column.
Residential versus commercial mortgages		
Description of the difference made between residential/owner occupied and commercial properties	The Danish FSA sets guidelines for the grouping of property in categories. Propert type is determined by its primary use.	у
Describe when you classify a property as commercial?	Property which primary purpose is owner occupation is characterised as residential. Whereas properties primarily used for commercial purposes are classified as commercial (cf. below). The Danish FSA sets guidelines for the grouping of property in categories. Example of application of which classifies property as commercial are: Office	25
E.g.: Private rental, Manufacturing and Manual Industries, Offices and Business, Agriculture.		
	Warehouse Restaurants, inns etc. Hotels and resorts Congress and conference centres. Campsites. Traffic terminals, service stations, fire stations, auction and export houses. Agriculture Forestry Nurseries Ships	
NPL (Non-performing loans)		
	A loan is categorised as non-performing when a borrower neglects a payment failing to pay instalments and / or interests.	
Describe how you define NPLs	The NPL rate is calculated at different time periods after the original payment date Standard in Table A is 90 day arrear.	е.
Explain how you distinguish between performing and nonperforming loans in	Commercial bank CB issuers adhere to the Basel definition of NPL. No distinction made. Asset substitution i not allowed for specialised mortgage banks.	
the cover pool?		
Are NPLs parts of eligible assets in cover pool? Are NPL parts of non eligible assets in cover pool?	The Basel definition of NPL's is applied for commercial bank CB issuers Asset substitution i not allowed for specialised mortgage banks, hence NPLs are part of the cover pool.	
assaulter post.	For commercial bank CB issuers NPL's are eligible assets in the cover pool. Asset substitution i not allowed for specialised mortgage banks, hence loans in foreclosure are part of the cover pool.	
Are loans in foreclosure procedure part of eligible assets in cover pool?	For commercial bank CB issuers loans in foreclosure procedure are eligible assets in the cover pool.	
If NPL and/or loans in foreclosure procedure are part of the covered pool which provisions are made in respect of the value of these loans in the cover pool?	The Danish FSA set rules for loss provisioning. In case of objective evidence of impairment provisioning for loss must be made.	

Table X2	
Key Concepts Explanation	Issuer specific (N/A for some issuers)
Guaranteed loans (if part of the cover pool) How are the loans guaranteed?	
Please provide details of guarantors	
Loan-to-Value (LTV)	Legal framework for valuation and LTV-calculation follow the rules of the Danish FSA - Bekendtgørelse nr. 687 af 20. juni 2007
	The publication contains two different ways to monitor LTV. One where loans are distributed continuously and one where they are distributed discretely. In both tables the fair value of the loans are distributed into predefined LTV bracket intervals. Table M4a/b4a and M4b/B4b displays the loans continuously. Table M4c/B4c and M4d/B4d displays the loans discretely.
Describe the method on which your LTV calculation	The continuous table(M4a/b4a and M4b/B4b) distributes the loans from the start Itv of the loan to the marginal Itv. This means that, if the loan is first rank, it is distributed proportionally by bracket size from 0 to the marginal Itv into the predefined brackets. If the loans has prior liens, it is distributed from the marginal Itv of the prior liens to the marginal Itv of the loan under consideration.
is based	The discrete table (M4c/b4c and M4d/B4d) distributes the total fair value of each loan into a single ltv bracket, according to the marginal ltv of the loan under consideration. Average LTV is weighted by loan balance categorised by property type.
	Example 1a below shows a case where the loan is first rank and distributed continuously. Example 1b shows the case where the loans has prior liens and distributed continuously. Example 2 below shows the discrete distribution of a loan.
Frequency of collateral valuation for the purpose of calculating the LTV	Example 1a Explanation Example of a proportionally distribution into LTV brackets for a loan with LTV of 75 pct and a loan size of 1 million and no prior liens. Loan-to-value (distribution continuously)

THE PARTY OF THE P

Table X3

Table A3	
General explanation	General practice in Danish market
Table A	Delicial practice in Dailish market
Total Balance Sheet Assets	Total balance sheet assets as reported in the interim or annual reports of the issuer, fair value
Total Customer Loans(fair value)	All mortgage credit loans funded by the issue of covered mortgage bonds or mortgage bonds measured at fair value
Tier 1 Ratio (%)	The tier 1 capital ratio as stipulated in DFSA regulations
Solvency Ratio (%)	The solvency ratio as stipulated in DFSA regulations
Outstanding Covered Bonds (fair value)	The circulating amount of covered bonds (including covered mortgage bonds and mortgage bonds)
Outstanding Senior Unsecured Liabilities	All outstanding senior unsecured liabilities including any intra-group senior unsecured liabilities to finance OC- and LTV-ratio requirements
Senior Secured Bonds	Senior secured bonds - formerly known as JCB (§ 15)
Guarantees (e.g. provided by states, municipals, banks)	All guarantees backing the granted loans provided by e.g. states, municipalities or banks
Net loan losses (Net loan losses and net loan loss provisions)	The item taken from the issuer's profit & loss account
Value of acquired properties / ships (temporary possessions, end quarter)	Value as entered in interim and annual reports and as reported to the DFSA; The lower of the carrying amount at the time of classification and the fair value less selling costs.
Total customer loans (market value)	All mortgage credit loans funded by the issue of covered mortgage bonds or mortgage bonds measured at market value
Maturity	Maturity distribution of all mortgage credit loans
Non-performing loans (See definition in table X1)	Please see definition of Non-performing loans in table X1
Loan loss provisions (sum of total individual and group wise loss provisions, end of	All individual and group wise læoan loss provisions as stated in the issuer's interim and annual accounts
quarter)

General explanation	General practice in Danish market
Table G1.1	
Nominal cover pool (total value)	Sum of nominal value of covered bonds + Senior secured debt + capital. Capital is: Additional tier 1 capital (e.g. hybrid core capital) and Core tier 1 capital
Transmission or liquidation proceeds to CB holders (for redemption of CBs	Liquidity due to be paid out next day in connection with refinancing
maturing 0-1 day)	
Overcollateralisation	Total value of cover pool - nominal value of covered bonds
Senior secured debt	Total nominal value of senior secured debt
Senior unsecured debt	Issuers senior unsecured liabilities targeted to finance OC- and LTV-ratio requirements in cover pool
Tier 2 capital	Subordinated debt
Additional tier 1 capital (e.g. hybrid core capital)	Hybrid Tier 1 capital (perpetual debt instruments).
Core tier 1 capital	Equity capital and retained earnings.

	In	
General explanation		The issuer can elaborate on the applied balance priciple.
Table G3		E.g. describe if stricter pratice is applied than required by law
General balance principle	The general balance principle does not require a one-to-one balance between the loan and the bonds issued. This gives the credit institution a wider scope for taking liquidity risk than the more strict specific balance principle.	
Specific balance principle	The specific balance principle ensures a one-to-one balance between loans and bonds issued, and is used for the issuance of SDRO, SDO and RO bonds. The specific balance principle de facto implies full cash flow pass through from borrowers to investors. Under this principle daily loan origination is continuously tapped into the market, and the individual borrower loan rate is determined directly by the bond sales price for the corresponding financing amount of bonds. All borrower payments of interest and principal payments to investors exactly (borrower payments fall due one day prior to the payments to investors. Redemptions take place by borrowers' buy back of the financing bond in the market at market price, or (for callable bonds) by calling the bond at par. In the latter case the borrower prepayment match the bond draw down. Market risks are thus eliminated under this issuance model (i.e. interest rate risk, prepayment risks, liquidity risks and funding risks). Further, asset substitution is not possible under this issuance model.	

General explanation	General practice in Danish market	
Table G4		
One-to-one balance between terms of granted loans and bonds issued, i.e. daily tap issuance?	Mortgage banks issue and sell bonds to investors, who then fund the loans. During the loan terms, borrowers make principal and interest payments to mortgage banks which transfer the amounts to investors. Mortgage banks charge a margin from the borrower to cover daily operating costs, potential losses, and to make a profit. The margin is a percentage of the outstanding debt which the borrower pays throughout the loan term. The margin rate corresponds to the interest margin of a bank but is generally lower. The issuance is made on a daily basis.	
Pass-through cash flow from borrowers to investors?	Yes, the mortgage bank is an intermediary between persons requiring loans for the purchase of real properties and investors funding the loans by purchasing bonds.	
Asset substitution in cover pool allowed?	No, (due to Danish legislation) asset substitution is not allowed/possible.	

General explanation		
Table M1-M5	General practice in Danish market	
Owner-occupied homes	Private owned residentials used by the owner, Max LTV are 80 % (legislation).	
Holiday houses	Holiday houses for owners own use or for renting. Max LTV are 60 % (legislation).	
Subsidised Housing	Residential renting subsidesed by the goverment. Max LTV 80 %. LTVs above 80 % can be granted against full govermental guarantee,	
Cooperative Housing	Residential property owned and administreted by the coopereative and used by the members of the cooperative. Max LTV 80 % (legislation).	
Private rental	Residential property rentes out to private tenants. Max LTV 80 % (legislation).	
Manufacturing and Manual Industries	Industrial and manufacture buildings and warehouse for own use or for rent. Max LTV are 60 %(legislation).	
Office and Business	Office property and retail buildings for own use or for rent. Max LTV are 60 %(legislation).	
Agriculture	Property and land for agricultural use. Max LTV 70 % (legislation).	
Social and cultural purposes	Property used for education, kindergardens, museum and other buildings for public use. Max LTV are 70 %(legislation).	
Other	Property, that can not be placed in the categories above. Max LTV are 70 %(legislation).	

General explanation	General practice in Danish market
Table M6-M8	
Index Loans	These are loans where instalments and outstanding debt are adjusted with the development of an index which typically reflects trends in consumer prices. The loan ype was
Fixed-rate loans	The long-term – typically 30-year – fixed-rate, callable loan is considered the most traditional mortgage loan. With this loan, the borrower knows in advance the fixed repayments
Adjustable Rate Mortgages	Adjustable-rate mortgages (ARMs) were introduced in 1996 and the main advantage of ARMs is that interest rates are generally lower than those of fixed-rate loans when raised.
Money market based loans	The loan rate changes at generally three or six months. In addition, this loan type differs from ARMs as this interest rate depends on a reference rate, ie an interest rate
Non Capped floaters	These are loans where the rate changes at generally three or six months. The reference rate of DKK-denominated loans is CIBOR (Copenhagen Interbank Offered Rate) or CITA
Capped floaters	It is possible to get a loan with a floating interest rate which cannot exceed a certain level (cap). In this way, the borrower hedges against major interest rate increases. If a loan
Other	Any other loan types, which not comply with the above mentioned.

General explanation	General practice in Danish market
Table M9-10	
Seasoning	Seasoning defined by duration of customer relationship, calculated from the first disbursement of a mortgage loan.

Further information	Link or information
In 2014 the Danish covered bond legislation was changes in order to address	
refinancing risk. Please find information på following link	http://www.realkreditraadet.dk/Default.aspx?ID=2926
